BENEV
Progressive Skin Science

GF-DNA SERUM

SKIN TYPES: Combination, Oily, Sensitive, Dry, Problematic

Designed to diminish the signs of aging and sun damage with a blend of growth factor proteins and plant extracts

KEY INGREDIENTS:

- Human Fibroblast Conditioned Media
- Cotton Extract
- Watermelon Extract

KEY BENEFITS:

- Contains multiple growth factors found in healthy, young skin plus antioxidants and nourishing natural plant extracts
- Light, concentrated gel formula that absorbs quickly
- Helps promote firmer, smoother skin and restore a youthful, healthy glow
- Excellent for enhancing recovery after laser and other procedures

WHY IT WORKS:

- Growth factors are natural proteins abundant in young skin that regulate skin's repair processes and decline with age
- Studies indicate that topical application of growth factors may improve skin's texture and elasticity

CLINICAL USE:

Apply prior to SkinStamp procedures and after all other treatments.

HOW TO USE:

Apply a small amount and gently pat onto skin. Use nightly on face and neck. For post-treatment care of laser and chemical peels, apply 2-3 times daily.

COMPANION PRODUCTS:

- GF-Eye Gel
- Retinol Cream
- Azalex Gel
- Emlite Cream

GF-EYE GEL

SKIN TYPES: Combination, Oily, Sensitive, Dry, Problematic

Intensive eye gel with growth factor proteins designed to rejuvenate the appearance of the skin around the eyes

KEY INGREDIENTS:

- Human Fibroblast Conditioned Media
- Acetyl Hexapeptide-8
- Hesperiden Methyl Chalcone

KEY BENEFITS:

- Contains multiple growth factors found in young, healthy skin to restore youthful skin function
- Promotes smoother skin with tightening peptides
- Regular use helps diminish the appearance of fine lines and dark circles

WHY IT WORKS:

- Growth factors are natural proteins abundant in young skin that regulate skin's repair processes and decline with age
- Infused with the latest in peptide technology, promoting a firmer, smoother eye contour

CLINICAL USE:

Apply prior to SkinStamp procedures and after all other treatments.

HOW TO USE:

Apply a small amount to under eye area. Gently pat onto skin. Use morning and/or night. For best results, use daily for 6-9 weeks.

COMPANION PRODUCTS:

- GF-DNA Serum
- Vitamin C Serum

GF HYDROGEL MOISTURIZING MASK

SKIN TYPES: Combination, Oily, Sensitive, Dry, Problematic

Super hydrating gel mask designed to calm skin and rebalance the moisture barrier

KEY INGREDIENTS:

- Chondrus Crispus (Red Algae) Powder
- Artemisia Princeps Leaf Extract
- Epidermal Growth Factor
- Green Tea Extract
- Dipalmitoyl Hydroxproline

KEY BENEFITS:

- Natural polymer hydrogel with seaweed soothes skin after procedures
- Restores hydration to dry or dehydrated skin
- Helps reduce redness

WHY IT WORKS:

- Contains growth factor proteins and natural ingredients that are rich in anti-oxidants, omega-3 and -9, calming agents, and anti-bacterial agents
- Mask comes in two parts, allowing for a perfect fit for every face
- Hydrogel technology inhibits the evaporation of moisture while delivering maximum absorption of mask solution

CLINICAL USE:

Use after any non-ablative treatment, such as microdermabrasion, chemical peel, LED or IPL. Open pouch and apply mask to skin. Leave on 15-20 minutes and peel

away (gel design will not adhere to skin, leaving it calm and hydrated). Do not rinse. Moisturize and protect skin after removal.

HOME USE:

Use mask 1-2 times weekly to keep skin from feeling dry. Open pouch and apply mask to skin. Leave on 15-20 minutes and peel away. Do not rinse. Moisturize and apply SPF if during daytime.

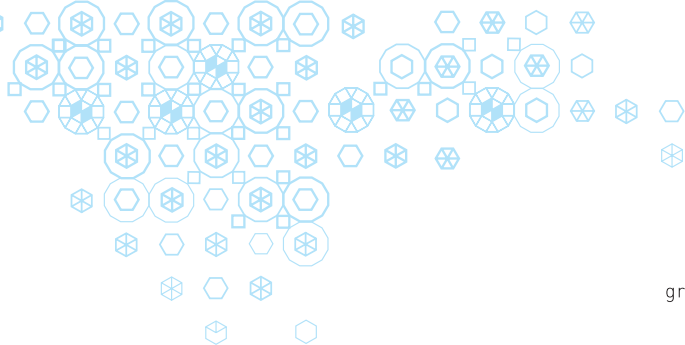

COMPANION PRODUCTS:

- GF-DNA Serum
- GF-Eye Gel
- Essential Lipids
- Silicone Spray

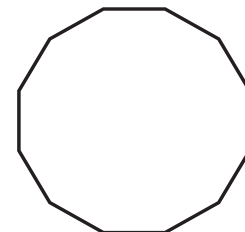

BENEV® products are scientifically engineered with proven ingredients and manufactured in our FDA-registered manufacturing facility, which maintains strict pharmaceutical-level production guidelines to ensure quality and integrity within each finished product.

GF VITALIZING SHAMPOO

A stimulating shampoo designed to vitalize the scalp and hair follicles

KEY INGREDIENTS:

- Human Fibroblast Conditioned Media
- Rosemary Leaf Oil
- Peppermint Oil

KEY BENEFITS:

- Removes product buildup and helps relieve dry scalp, which can effect how hair grows
- Contains a mild, plant-based cleanser that won't fade color
- Helps increase microcirculation to promote healthy hair growth

WHY IT WORKS:

- High protein formula with multiple growth factors provides the scalp with ideal nourishment
- Rosemary and peppermint oil stimulate hair follicles

CLINICAL USE:

Home use only.

HOW TO USE:

Massage one pump onto scalp only. Rinse well. Follow with conditioner of your choice. Use twice a week for dry or fragile hair, more often for oilier hair or stronger hair. May use other shampoo in between uses.

COMPANION PRODUCTS:

- GF Serum
- Hair Revive Mist

CANDIDATES: Combination, Oily, Sensitive, Dry, Problematic

GF SCALP REVIVE SERUM

Protein-rich serum blended with vitamin B and beneficial plant extracts designed to condition the scalp to allow optimal hair growth

KEY INGREDIENTS:

- Epidermal Growth Factors
- Fibroblast Growth Factors
- Biotinoyl Tripeptide-1
- Vitamin B3 and B6

KEY BENEFITS:

- Contains growth factors that support healthy, productive hair follicles
- Moisturizes scalp
- Increases shine and helps strengthen hair

WHY IT WORKS:

- Specialized peptides encourage abundant hair development
- Nourishes with vitamins, fatty acids, and moisture to create an ideal, healthy environment for scalp and hair

CLINICAL USE:

Home use only.

HOW TO USE:

Shampoo and condition hair as usual, applying conditioner only to hair and not to the roots and scalp. Using the dropper, apply solution onto affected area(s) of the scalp. Quickly massage into the area and allow to dry. Use daily. Each vial should last approximately 1 week.

COMPANION PRODUCTS:

- GF Vitalizing Shampoo
- Hair Revive Mist

CANDIDATES: All hair types with signs of thinning

HAIR REVIVE MIST

Weightless mist for all hair types that provides and retains moisture

KEY INGREDIENTS:

- Apigenin
- Oleanolic Acid
- Aloe Barbadensis Leaf Extract

KEY BENEFITS:

- Keeps hair hydrated and frizz free throughout the day
- Increases shine and volume
- Does not interfere with styling products or leave any residue

WHY IT WORKS:

- Fifteen plant extract provide nourishment for healthy hair
- Antioxidants and fatty acids soothe and impart shine
- Humectant action helps hair draw in moisture all day long

CLINICAL USE:

Home use only.

HOME USE:

Spray onto wet or dry hair a minimum of four times daily and gently work in with fingertips.

COMPANION PRODUCTS:

- GF Vitalizing Shampoo
- Hair Revive Mist

CANDIDATES: Dry, Combination, Oily, Sensitive

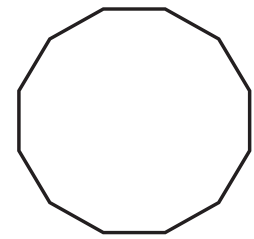

BENEV® products are scientifically engineered with proven ingredients and manufactured in our FDA-registered manufacturing facility, which maintains strict pharmaceutical-level production guidelines to ensure quality and integrity within each finished product.

GF REJUVENATING COMPLEX

SKIN TYPES: Combination, Oily, Sensative, Dry, Problematic

Clinical use growth factor concentrate designed to repair the signs of aging and sun damage

KEY INGREDIENTS:

- Epidermal Growth Factor
- Fibroblast Growth Factor
- Palmitoyl Tetrapeptide-7

KEY BENEFITS:

- Ultra-pure, non-irritating formula that can be used during and after many procedures to enhance results
- Smooths the appearance of fine lines and wrinkles
- Supports new cell generation and firmer skin for a younger-looking complexion
- Moisturizes and fights free radical damage with anti-oxidants and vitamins

WHY IT WORKS:

- Growth factors are natural proteins abundant in young skin that regulate skin's repair processes and decline with age
- Scientific studies have shown that dermal application of growth factors can improve skin's texture and elasticity

CLINICAL USE:

Apply during and after BENEV SkinStamp, dermal roller, non-ablative laser, LED, RF, ultrasound, or other procedures designed to enhance penetration of topical ingredients. Use after re-epithelialization following ablative laser. Apply post-op chemical peels. Use before plastic surgery and after

sutures have been removed. May also be applied as an under mask serum under any BENEV mask.

HOW TO USE:

Clinical use only.

COMPANION PRODUCTS:

- GF-DNA Serum
- Redoxa Cream

MPF COMPLEX KIT

SKIN TYPES: Combination, Oily, Sensative, Dry, Problematic

Clinical use growth factor designed to repair the signs of aging and brighten skin

CONTAINS:

- 5 vials MPF Rejuvenating Complex
- 5 vials MPF Brightening Complex

KEY BENEFITS:

- Non-irritating formula that can be used during and after many procedures
- Supports new cell generation and firmer skin for a younger looking complexion
- Kit contains both Brightening and Rejuvenating to allow physicians to customize patients treatments

WHY IT WORKS:

- Growth factors are natural proteins abundant in young skin that regulate skin's repair process
- Contains a group of growth factors proven to fight skin aging

CLINICAL USE:

Apply after SkinStamp, dermal roller, non-ablative, laser, LED, RF, ultrasound or other procedures designed to enhance penetration of topical ingredients. Use after re-epithelialization following ablative laser. Apply post chemical peel.

HOW TO USE:

Clinical use only

COMPANION PRODUCTS:

- GF DNA Serum
- Hyaluronic Moisturizer

GF BRIGHTENING COMPLEX

SKIN TYPES: Combination, Oily, Sensative, Dry, Problematic

Clinical use growth factor concentrate designed to fade the appearance of hyperpigmentation and brighten skin

KEY INGREDIENTS:

- Epidermal Growth Factor
- Aminoethylphosphinic Acid
- Vitamins C, B2, B3, B5, B6, E, D2, H and K

KEY BENEFITS:

- Ultra-pure, non-irritating formula that can be used during and after many procedures to enhance results
- Reduces the appearance of sun/age spots and uneven skin tone
- Supports new cell generation for a more radiant complexion
- Leaves skin soft, smooth and conditioned

WHY IT WORKS:

- Growth factors are natural proteins abundant in young skin that regulate skin's repair processes and decline with age
- Contains ingredients believed to inhibit melanin and vitamins and antioxidants that help brighten skin and protect from free radical damage that can cause pigmentation problems

CLINICAL USE:

Apply during and after BENEV SkinStamp, dermal roller, non-ablative laser, LED, RF, ultrasound or other procedures designed to enhance penetration of topical ingredients. Use after re-epithelialization following ablative

laser. Apply post-op chemical peels. Use before plastic surgery and after sutures have been removed. May also be applied as an under mask serum under any BENEV mask.

HOW TO USE:

Clinical use only

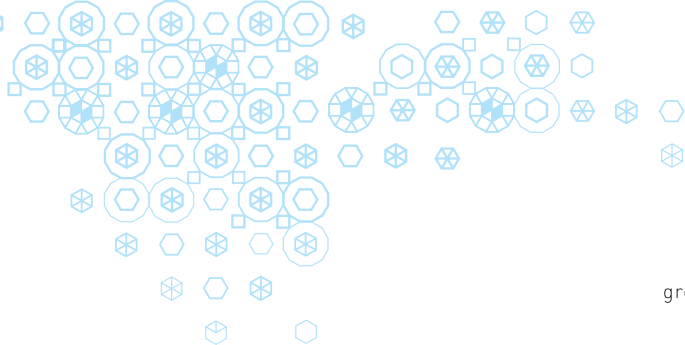

COMPANION PRODUCTS:

- GF-DNA Serum
- Emlite Cream
- Vitamin C Serum or Gel

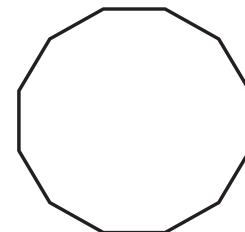

BENEV® products are scientifically engineered with proven ingredients and manufactured in our FDA-registered manufacturing facility, which maintains strict pharmaceutical-level production guidelines to ensure quality and integrity within each finished product.

growth factor

BENEV
Progressive Skin Science

GF HAIR CARE COMPLEX

SKIN TYPES: Combination, Oily, Sensitive, Dry, Problematic

Growth factor scalp treatment designed to restore the health and normal growth cycle of hair follicles

KEY INGREDIENTS:

- Human Fibroblast Conditioned Media
- Honeysuckle Extract

KEY BENEFITS:

- A clinical study showed, on average, a 42% improvement in regrowth and a 33% improvement in hair thickness
- No side effects
- Focuses on the health of the scalp and hair follicles to restore a normal, healthy hair growth cycle

WHY IT WORKS:

- Contains human fibroblast media formulated specifically for the skin of the scalp to accelerate DNA repair and restore the growth factors present in healthy, young hair follicles
- Contains honeysuckle extract to provide protection against cellular injury and support for vascular homeostasis

CLINICAL USE:

Use with clinical modalities that stimulate renewal such as BENEV SkinStamp or laser.

HOW TO USE:

Apply to affected areas of clean scalp before and after SkinStamp, laser, or other appropriate modality. For best results, perform a series of twice weekly treatments for ten weeks.

COMPANION PRODUCTS:

- GF Hair home care coming soon!

GF HAIR CARE COMPLEX+

SKIN TYPES: Combination, Oily, Sensitive, Dry, Problematic

Plus (+) powerful, potent, faster results in hair growth with Human Fibroblast Conditioned Media with KGF Concentration

KEY INGREDIENTS:

- Human Fibroblast Conditioned Media—with higher KGF Concentration
- Honeysuckle Extract

KEY BENEFITS:

- A clinical study showed, on average, a 81% improvement in the health of the hair and scalp
- Focuses on the health of the scalp and hair follicles to restore a normal, healthy hair growth cycle with growth factor support
- Moisturizes scalp
- Increases hair strength, shine and elasticity

WHY IT WORKS:

- Contains a higher concentration of KGF Concentration, which is known to induce proliferation of epithelial cells
- Contains human fibroblast conditioned media formulated specifically for the skin of the scalp to accelerate DNA repair and restore the growth factors
- Contains honeysuckle extract to provide protection against cellular injury and support for vascular homeostasis

CLINICAL USE:

Use with clinical modalities that stimulate renewal such as BENEV SkinStamp or laser.

HOW TO USE:

Apply to affected areas before and after SkinStamp, laser, or other appropriate modality.

COMPANION PRODUCTS:

- GF Hair home care coming soon!

MPF REJUVENATING COMPLEX

SKIN TYPES: Combination, Oily, Sensitive, Dry, Problematic

Clinical use growth factor concentrate designed to repair the signs of aging and sun damage

KEY INGREDIENTS:

- Palmitoyl Tetrapeptide-7 and Copper Tripeptide-1
- Human Fibroblast Conditioned Media
- Epidermal and Fibroblast Growth Factor
- Hyaluronic Acid

KEY BENEFITS:

- Non-irritating; can be used during/after procedures to enhance results
- Smooths the appearance of fine lines and wrinkles
- Supports new cell generation and firmer skin
- Fights free radical damage with anti-oxidants and vitamins
- Keeps wounds moist with a high concentration of hyaluronic acid

WHY IT WORKS:

- Growth factors are natural proteins abundant in young skin that regulate skin's repair processes and decline with age
- Scientific studies have shown that dermal application of growth factors can improve skin's texture and elasticity
- Contains a group of peptides proven to fight skin aging

CLINICAL USE:

Apply during and after BENEV SkinStamp, dermal roller, non-ablative laser, LED, RF, ultrasound or other procedures designed to enhance penetration of topical ingredients. Use after re-epithelialization following ablative laser. Apply post-op chemical peels.

HOW TO USE:

Clinical use only.

COMPANION PRODUCTS:
